# MOD. BASKET

 Se aplica a la prenda el acabado Micro-Mesh System que confiere al tejido una estructura entrecruzada (simulando un panel de abejas) que permite que el aire atraviese la prenda, evapore el sudor y el cuerpo transpire. Estas características son aquellas que el jugador de baloncesto requiere.

 Micro-Mesh System finish is applied to the garment, giving the fabric a cross-linked structure (simulating a honeycomb) that allows air to flow through the garment, the perspiration evaporates and the body is able to breathe. These features are those that basketball players require.

 Il filo in Micro-Mesh System conferisce al tessuto una struttura incrociata (nido d'api) che permette ampia ventilazione, evaporazione del sudore e traspirazione. Queste sono le caratteristiche che il giocatore di pallacanestro richiede.
